Mini-PROTEAN Tetra Vertical Electrophoresis Cell

Overview

The versatile, easy-to-use Mini-PROTEAN Tetra Cell is a vertical mini gel electrophoresis system designed for fast, simple setup, facilitating rapid sample optimization, method development, and targeted protein analysis. The Mini-PROTEAN Tetra Cell eliminates tedious assembly procedures and has a patented sealing mechanism* that prevents assembly errors during gel casting.

Features and Benefits

- Can run one to four precast or handcast mini gels in 15–20 min
- Can be used for western blotting with the Mini Trans-Blot Module
- Thermoplastic casting gaskets seal tightly to ensure leak-free casting
- Casting frames** with simple cam closure provide precision alignment on any flat surface
- Side-by-side casting stand** allows access to both gels simultaneously, and a spring-loaded lever creates a tight seal against the thermoplastic rubber gasket
- Complete 2-D gels in less than a day

Applications and Uses

- Polyacrylamide gel electrophoresis (PAGE or SDS-PAGE)
- 2-D gel electrophoresis
- Screening samples
- Evaluating sample preparation conditions

Included Components

- All Tetra Cells include buffer tank, electrode assembly, lid with power cables, and mini cell buffer dam

- Tetra Cells for hand casting include casting frames and stands, glass plates, 10-well gel combs, sample loading guide, and TGX Stain-Free FastCast Acrylamide, 10% (161-0182)

Configuration Options

The Mini-PROTEAN Tetra Cell is configurable for 1–4 precast or handcast gels in different thicknesses, and bundled with power supplies and blotting modules. Any 2-gel Tetra Cell can be converted to a 4-gel system by adding a companion running module (1658038).

Mini-PROTEAN Tetra Cells

Gel Compatibility	Gel Capacity	Catalog Number
Precast mini gels	2 gels	1658005
Precast mini gels	4 gels	1658004
Handcast mini gels (0.75 mm thick)	2 gels	1658002FC
